

Homemade Ice Cream

Prep Time: 30 mins

Chilling Time: 2 hrs

Total Time: 2 hrs 30 mins

Serves 4 to 8

This homemade vanilla ice cream recipe is the BEST summer treat! With only 5 ingredients, it couldn't be easier to make. Just remember to **freeze the bowl of your ice cream maker at least 12 hours before** you plan to churn the ice cream. See the post above for mix-in and topping suggestions!

Equipment

- KitchenAid Ice Cream Maker Attachment
- Cuisinart Ice Cream Maker

Ingredients

- 1½ cups heavy cream
- 1½ cups whole milk
- ¾ cup cane sugar
- 2 teaspoons vanilla extract
- ⅛ teaspoon sea salt

Instructions

1. In a medium saucepan, combine the cream, milk, sugar, vanilla, and salt. Warm over medium-low heat, whisking often, for 5 minutes, or until the sugar dissolves and the mixture is warmed through.
2. Pour into a heatproof bowl, cover, and chill for 2 hours or overnight.
3. Remove the chilled ice cream base from the fridge and whisk well. Churn in an ice cream maker according to the manufacturer's instructions, typically 20 to 30 minutes. The ice cream will be soft after churning. For firmer ice cream, transfer to an airtight container and freeze for 2 to 4 hours before serving.
4. Store in an airtight container in the freezer for up to a month. If the ice cream is too firm to scoop straight from the freezer, let sit at room temperature for a few minutes to soften.

Notes

Makes 1 quart
